Academic Year: 2025-26 Subject: User Interaction Design
Class: SYMCA Course Code:MC511 Semester: III

Practical List

Expt. No.	Experiment Details	Ref.	CO
1	To Study of open-source UX tools (Justinmind Prototype, Pidoco, Marvel ,Figma Prototype) and create a simple design for a given problem definition.	2, 3	CO1,CO2,CO3, CO4,CO5
2	Know your client. - Design an app that can teach mathematics to children of 4-5 years age in schools in Rural Sector. - Design an app that can teach mathematics to children of 4-5 years age in schools in Urban Sector. - Design a site that can help people to sell their handmade products in metro cities. - Design a site that can connect housewives and keep them engaged. Note : Students should be able to do the following for any given problem statement - Analysis of user's/client's behavior eg their preferences, interests etc - What kind of interfaces will they like and why? - Existing apps - analyze and rate them. - What will be your choice of screen elements? - How will your app/web design be better than the existing one?	2,4	CO1,CO2,CO3, CO4,CO5
3	Goal-oriented design - Design an experience for passengers whose flight /train is delayed.	2, 1	CO1,CO2,CO3, CO4,CO5
4	Design Principles - Understand principles of good UI design by heuristic evaluation. Design UI for a given problem statement.	3	CO1,CO2,CO3, CO4,CO5
5	Menus & Navigation – Redesign of a user interface (Suggest and implement changes in Existing User Interface) for a given problem statement.	3,2	CO1,CO2,CO3, CO4,CO5
6	Windows & Screen controls – Design UI for a given problem statement. - Design a navigator for a student new in your Institute. - Design a navigator for a person new in tourist city/ village. - Motor paralysis for differently able people. Vaccination App design with localization	3	CO1,CO2,CO3, CO4,CO5

BHARATIYA VIDYA BHAVAN'S
SARDAR PATEL INSTITUTE OF TECHNOLOGY
MUNSHI NAGAR, ANDHERI (WEST), MUMBAI – 400 058.
Department of Computer Science and Engineering
MASTER OF COMPUTER APPLICATIONS

Academic Year: 2025-26 Subject: User Interaction Design
Class: SYMCA Course Code:MC511 Semester: III

7	Icons - Design appropriate icons pertaining to a given domain. (Eg. Greeting cards, Travelling, restaurants, Education, Medical, security at Airport, Malls etc)	3	CO1,CO2,CO3, CO4,CO5
8	Colors – Design a personal website for any socio-technical problem. Use color guidelines with statistical graphics for better visualization.	2,3	CO1,CO2,CO3, CO4,CO5
9	Design a Map-based UI(Web User) for the given problem statement. Example: Mumbai Dabbawallas with localization feature. Pet Care New Visitors to Hospital	2,3,4	CO1,CO2,CO3, CO4,CO5
10	To calculate the screen complexity of the existing Graphical User Interface and redesign the interface to minimize the screen complexity.	2,3,4	CO1,CO2,CO3, CO4,CO5

Note: The main outcome of the above experiments is to make the final design usable and it should be deliverable to the user. The experiments are set to practice the UI tools with which the above experiments can be designed and evaluated using User Interface design guidelines.

All the students from each batch are required to evaluate their experiment/application using the given usability chart.

Text Books

1. Alan Dix, J. E. Finlay, G. D. Abowd, and R. Beale, Human Computer Interaction, 3rd ed., Pearson, Prentice Hall, 2003.
2. Wilbert O. Galitz, The Essential Guide to User Interface Design, 3rd ed., Wiley publication, 2007.
3. Donald A. Norman, Design of Everyday Things, 2nd ed., Basic Books; Reprint edition, 2013.
4. Kalbande, Kanade, and Iyer, Galitz's Human Machine Interaction, 1st ed., Wiley Publications, 2015.

Reference Books

1. Rogers, Sharp, and Preece, Interaction Design: Beyond Human Computer Interaction, 5th ed., Wiley publications, 2019.
2. Brian Fling, Mobile Design and Development, 1st ed., O'Reilly Media Inc., 2009.

Course In-charge

MASTER OF COMPUTER APPLICATIONS

Academic Year: 2025-26 Subject: User Interaction Design
Class: SYMCA Course Code:MC511 Semester: III

Experiment No.1

Course outcome no: CO1,CO2,CO3,CO4

Title: To Study open source UX tools (Justinmind Prototype, Pidoco, Figma, Marvel Prototype) and create UX design for a given problem definition.

Objectives:

- 1) To learn various UX tools.
- 2) To understand the features of various UX Tools.
- 3) To select the tool which gives better functionality.

Tools Used: Figma, Marvel, Just-in-Mind

Lab exercise:

Task: Download Justinmind tool (link: <https://www.justinmind.com/>), Figma (Link: <https://www.figma.com/>), Marvel Tool (Link: <https://marvelapp.com/>) and create an App for your own profile which will include (Name, email id,contact, hobby, Photo, instagram, facebook and linkedin id, Special Skills you have etc. Note: First page will be welcome page with button on it which will redirect to your profile page. Use your own creativity.

Documents to be uploaded:

Note: The document should have header with title of the assignment and footer with name, roll no and page number in it.

BHARATIYA VIDYA BHAVAN'S
SARDAR PATEL INSTITUTE OF TECHNOLOGY

Department of Computer Science and Engineering
MASTER OF COMPUTER APPLICATIONS

Academic Year: 2025-26 Subject: User Interaction Design
Class: SYMCA Course Code:MC511 Semester: III

Following files need to be uploaded for the submission of practical:

1) Document consist of the following questions and answers:

- Q1. Compare different features of Justin mind ,Marvel, Figma tool.
Q2. Which of the above tool would you recommend and use and why?
Q3. While Creating your own Profile design , what things did you keep in mind about the look and feel as well as other aspects if you have considered?
Q4. Screenshots of the UI created by the tool.
2) Project file to be attached or the link needs to be shared.

Turn1:

Performan ce indicators	PI1: Experimental Procedures (0.5)	PI2: Effort (1)	PI3: Result and Creativity (2)	PI4: Documentat ion (0.5)	PI5: Question and Answer (1)	Total marks
Marks						

Sign of the faculty:

Academic Year: 2025-26 Subject: User Interaction Design
Class: SYMCA Course Code:MC511 Semester: III

Experiment No.2

Course outcome no: CO1,CO2,CO3,CO4

Title: Know Your Client

Objectives:

- 1) To understand and analyze Client and Users Needs.
- 2) To create UI for for the given problem statement.
- 3) To evaluate the UI using Lyssna Tool.

Tools Used: Figma Tool (Prototyping), Lyssna (Testing)

Lab Exercise:

Task/Activity:

Step 1: Find different websites which furnish the same task.(Minimum 3)

Step 2: Do Usability Testing on the website. (Use the websites and find the good and bad designs of the websites)

Step 3: You can use the good Designs and avoid Bad Designs so that if any users use your website they do not face the same issues

Step 4: Write down your own Design Goals which you want to furnish while making the website.

Step 5: Create Design on Figma.

Step 6: Test your application using Lyssna

Documents to be uploaded:

Note: The document should have header with title of the assignment and footer with name, roll no and page number in it.

Academic Year: 2025-26 Subject: User Interaction Design
Class: SYMCA Course Code:MC511 Semester: III

Following files need to be uploaded for the submission of practical:

A) Document consist of the following questions and answers:

- 1) Who are your Target Audience? and their age group?
- 2) Is choosing colors a challenging task? why?
- 3) What things have you kept in mind while designing the website ? What kind of interfaces will they like and why?
- 4) Write down your design goals which you have thought earlier while doing the above activity.
- 5) Link of websites you have referred to analyse the competition?
- 6) Is understanding the psychology important?
- 7) Screenshots of UI made
- 8) Link of Figma file and Testing files of application.
- 9) List the Good and Bad Designs which you have found in the activity analyses. You can use the good Designs and avoid Bad Designs so that if any users use your website they do not face the same issues
- 10) How will your app/web design be better than the existing one?
- 11) Testing result analysis through Lyssna.

Turn1:

Turn2:

Performance indicators	PI1: Experimental Procedures (0.5)	PI2: Effort (1)	PI3: Result and Creativity (2)	PI4: Documentation (0.5)	PI5: Question and Answer (1)	Total marks

Experiment No. 3

Course outcome no: CO1,CO2,CO3,CO4

Title: Goal-oriented design- Design an experience for passengers whose flight /train is delayed.

Objectives:

- 1) To understand the issues for developing mobile UI.
- 2) To analyze the given problem along with Competitors (If any)
- 3) To create Mobile UI using Figma tool.
- 4) To Test for Usability.

Tools Used: Figma Tool (Prototyping), Lyssna (Testing)

Lab Exercise:

Task/Activity:

Step 1: Find different websites which furnish the same task.(Minimum 3)

Step 2: Do Usability Testing on the website. (Use the websites and find the good and bad designs of the websites)

Step 3: You can use the good Designs and avoid Bad Designs so that if any users use your website they do not face the same issues

Step 4: Write down your own Design Goals which you want to furnish while making the website.

Step 5: Create Design on Figma.

Step 6: Test your application using Lyssna

Experiment No. 4

Course outcome no: CO1,CO2,CO3,CO4

Title: Design Principles- Understand principles of good UI design by heuristic evaluation.
Design UI for a given problem statement.

Objectives:

- 1) To understand Neilson's heuristics.
- 2) To Analyze and apply Neilson's Heuristics on real world problem
- 3) To make report using Neilson's Heuristics.

Tools Used: Word Document and Excel.

Lab Exercise:

Task:

Create Heuristics report for IRCTC website as per the given format. Redesign a single page as per your analysis which needs improvement.

Kindly Read the document of heuristics to understand the procedure.

You need to create 2 reports, one excel sheet as specified format and one will be PDF as per the format given.

Upload both report.

Experiment No. 5

Title: Menus & Navigation– Redesign of a user interface (Suggest and implement changes in Existing User Interface) for a given problem statement.

Objectives:

- 1) To analyze the existing App and identify out the issues.
- 2) To create a new app by analyzing the existing app.

Tools Used: Figma Tool (Prototyping), Lyssna (Testing)

Lab Exercise:

Task/Activity:

- 1) Download S.P.I.T. college APP/ other college APP.
- 2) Perform various task and write down your own summary about the app in bullet points and precise (in terms of UX Design).
- 3) Design your own APP for college (with all the features and functionality as expected) which can be used by the college . Use your own creativity.
- 4) Write down the UX design Goals which you have considered for designing the APP.

Go through the following link:

<https://www.nngroup.com/articles/ten-usability-heuristics/>

Documents to be uploaded:

Note: The document should have header with title of the assignment and footer with name, roll no and page number in it.

Experiment No. 6

Course outcome no: _____

Title: Windows & Screen controls– Design UI for a given problem statement.

Objectives:

- 1) To study all the existing restaurants UI
- 2) To identify good and bad features
- 3) To create UI and logo for the restaurant.
- 4) Make Feedback System for the same.
- 5) To evaluate/Test it using Usability hub.

Tools Used: Figma Tool (Prototyping), Lyssna (Testing)

Lab Exercise:

- a. Design a navigator for a student new in your Institute.
- b. Design a navigator for a person new in tourist city/ village.
- c. Motor paralysis for differently able people.
- d. Vaccination App design with localization

Documents to be uploaded:

Note: The document should have header with title of the assignment and footer with name, roll no and page number in it.

Following files need to be uploaded for the submission of practical:

A) Document consist of the following questions and answers:

- 1) What things have you kept in mind while designing the App.

Experiment No. 7

Course outcome no: _____

Title: Icons- Design appropriate icons pertaining to a given domain. (Eg. Greeting cards, Travelling, restaurants, Education, Medical, security at Airport, Malls etc)

Objectives:

- 1) To analyze the given situation and gather requirement.
- 2) To create icons for the given problem statements .

Tools Used: Figma Tool (Prototyping), Usability Hub (Testing)

Lab Exercise:

Task:

Consider any problem scenario given: Greeting cards, Travelling, restaurants, Education, Medical, security at Airport, Malls etc.
Create 7-10 icons for the same .

Documents to be uploaded:

Note: The document should have header with title of the assignment and footer with name, roll no and page number in it.

Following files need to be uploaded for the submission of practical:

A) Document consist of the following questions and answers:

- 1) Complete Description of SCAMPER technique based on your Project.
- 2) What things have you kept in mind while designing the App.
- 3) Link of App you have referred to analyse the competition?
- 4) Write down your design goals which you have thought earlier while doing the above activity.
- 5) Screenshots of UI made
- 6) Link of Figma file
- 7) .Usability Testing link and Excel sheet(csv file) of the results.

Experiment No. 8

Course outcome no: _____

Title: Colors– Design a personal website for any socio-technical problem.
Use color guidelines with statistical graphics for better visualization.

Objectives:

- 1) To analyze the situation of farmers and gather requirement.
- 2) To create Website for the same.

Tools Used: Figma Tool (Prototyping), Usability Hub (Testing)

Lab Exercise: Task: Create 2 login (Consumer and Admin) Consumer/customer should be able to browse and purchase (use your own creativity) . Purchase would be Cash on Delivery along with confirmation to the user about the purchase. Tracking information should be available. Customer should be able to give rating to the purchase (Do this through Ease animation of Figma). Admin should be able to add images, description etc and other factors depending on the analysis and brainstorming done by you.

Documents to be uploaded:

Note: The document should have header with title of the assignment and footer with name, roll no and page number in it. Following files need to be uploaded for the submission of practical:

A) Document consist of the following questions and answers:

- 1) What things have you kept in mind while designing the App.
