

STARTUP PROFILE

MediVault

Address: SP-TBI, Bhavan's Campus, Andheri West, Mumbai.

Abstract: Medivault is a secure digital health record management platform that empowers patients to store, access, and share their medical data with full control. The system integrates hospitals, clinics, and labs into a unified network compliant with the Ayushman Bharat Digital Mission (ABDM). Using encrypted cloud storage and a consent-based sharing model, MediVault ensures data privacy, transparency, and interoperability. The platform supports multilingual access, offline synchronization for rural areas, and AI-driven preventive health insights. Unlike traditional hospital-centric systems, MediVault follows a patient-first approach, granting individuals ownership of their health records and improving collaboration between doctors, patients, and insurers.

Executive Summary:

MediVault is a secure digital platform designed to store and manage patient health records. Patients can easily share their data with hospitals, clinics, and doctors with full control to grant or revoke access. The platform ensures privacy, improves healthcare data interoperability, and supports family-based data management.

Company Description:

Company Vision

To be the most trusted and accessible digital health information vault globally.

Company Mission

To empower patients with full control over their medical data while enabling healthcare providers to deliver smarter and faster care.

Company Values

MediVault is driven by a passionate team committed to trust, security, and innovation in digital healthcare. We uphold the highest standards of privacy and inclusivity, empowering patients with full control over their medical data while fostering seamless collaboration across the healthcare ecosystem.
